Weilun LIN

DATA QUALITY | AUTOMATION | DATA APPLICATIONS

Graduate of TBS Education's Grande École Programme, with an MSc in Artificial Intelligence & Business Analytics. Experienced in structuring and improving the quality of product data, as well as developing internal tools with Python, Streamlit, Excel and SQL. Able to translate business rules into automated controls and collaborate in an international environment.

PROFESSIONAL EXPERIENCE

Data Analyst — Assignment at APEM

Fixed-term contract via ITT 360 GmbH · 07/2025-09/2025

- Consolidated pricing data for **more than 200 product series** from Excel files into an internal management tool.
- Performed data quality and consistency checks, identified anomalies and worked with the team to correct them.
- Improved the reliability of data used to monitor pricing capabilities.

Consulting Engineer — Assignment at APEM

Fixed-term contract via Rhapsody - portage salarial

02/2024-03/2024 & 06/2024-08/2024

- Reorganised and reclassified **more than 200,000 product references** into a new hierarchical structure using Excel.
- Applied product family and series rules to ensure classification accuracy.
- Coordinated data validation with Data and Product teams in France, the UK, the US and Japan to improve the reliability of the international product database.

Data Scientist — APEM

School project: 09/2022-04/2023 · Internship: 07/2023-11/2023

- Developed two web applications with **Python, Streamlit, HTML and CSS** to automate the generation of product references.
- Gathered rules from Sales and Product teams, then translated compatibility constraints into automated controls.
- Identified and removed several thousand invalid configurations and supported internal testing of the first functional version.

PROJECTS

- TNP Datathon — Insurance fraud detection with Azure Machine Learning - Best Model Award 2023
- Air France-KLM — Consulting project, strategic analysis and recommendations on sustainable positioning
- Student chatbot — Python, NLP, model comparison and automated responses
- Real estate price forecasting — Data preparation, analysis and visualisation with Tableau
