EDUCATION

MSc Artificial Intelligence & Business Analytics

Toulouse Business School, France

2022-2024

Winner of the TBS Datathon 2023 – Best Model Award

Courses : Machine Learning, Deep Learning, NLP, Data Visualisation, Programming

Master Programme Grande Ecole (GPA 15/20)

Toulouse Business School, France

2021-2024

Courses : R Studio, Tableau, Data Analysis, Finance, Operational Management

Bachelor's in Financial Management (GPA 3.3/4)

Shanghai Lixin University of Accounting and Finance, China

2016-2020

Bachelor's in French (GPA 3.2/4)

Shanghai International Studies University, China

2017-2020

SKILLS

TECHNIQUE :

- Python
- MySQL
- R Studio
- Tableau
- PowerBI
- Microsoft Azure

LANGUAGES :

- Chinese : Native
- English : Fluent
- French : Fluent
- German : Intermediate
- Japanese : Elementary

Weilun LIN

Graduated with an MSc in Artificial Intelligence & Business Analytics from TBS Education, with over one year of experience in Data Science and data analysis projects applied to industry, finance, and consulting. Specialized in developing interactive dashboards (Streamlit, Power BI), automating reporting processes, and building predictive models.

PROFESSIONAL EXPERIENCE

Data Analyst

07/2025 - 09/2025

ITT 360 GmbH International Trading Team

Contributed to the analysis and consolidation of pricing data to improve the consistency of product series.

- Integrated and consolidated data from **200+ product series** into an internal management tool using Excel.
- Enhanced the pricing capacity tracking process through better data integration and validation.
- Analyzed data inconsistencies and collaborated with the team to resolve quality and coherence issues across series.

Data Consultant

02/2024 - 03/2024 & 06/2024 - 08/2024

RHAPSODY - PORTAGE SALARIAL

Reorganized and classified a catalog of **200,000+ product part numbers** into a new hierarchical structure using Excel, ensuring a smooth and precise transition.

- Analyzed and reclassified product numbers according to the new product hierarchy, considering specific features and differences across series.
- Collaborated with the DATA team and product managers across France, the UK, the US, and Japan to ensure the accuracy of product data.
- Improved the **international product database reliability**.

Data Scientist

09/2022 - 04/2023 & 07/2023 - 11/2023

APEM - Human-Machine Interface Manufacturer

Developed interactive web applications using Python, Streamlit, HTML, CSS, and JavaScript to simplify the identification of component restrictions and to automate part number generation.

- Collaborated with cross-functional teams to identify product and component restrictions across families and series.
- Designed two interactive tools **improving user experience** and enabling data visualization and validation.
- Provided training and technical support to users for efficient tool adoption.

PROJECTS

Create a chatbot for the school's international student center that automatically responds to common questions. 03/2023

Relevant knowledge: NLP, Machine Learning, ANN, Python

Develop a deep learning workflow for fraud prediction in car insurance for TNP (awarded the best model prize) 03/2023

Relevant knowledge: Data Science, Machine Learning, Microsoft Azure, Python

Conduct a strategic analysis for AirFrance-KLM to redefine market positioning with sustainable development initiatives. 02/2023

Relevant knowledge: Strategic Analysis, PESTEL, SWOT

Prepare and visualize sales data using Tableau, create a forecasting model for real estate prices, and provide recommendations to optimize portfolio management. 01/2023

Relevant knowledge: Tableau Prep, Tableau, Data Visualization

Build a Netflix movie recommendation model 01/2022-04/2022

Relevant knowledge: Python, Cosine similarity
